
(a) Start-up: average violations from empty knowledge bases
average violations
tick
Random (Erdos-Renyi)
Small world (Watts-Strogatz)
Scale free (Barabasi-Albert)
Layered (3 layers)
(b) Shock: the whole constraint set replaced at once
average violations
tick
(c) Spread of a new clause (share of agents holding it, while it lives)
share of agents
ticks since the clause was introduced
(d) Retired clauses: still believed (solid), disbelieved (dotted)
share of agents
ticks since the shock
